# Discussion:
# DELPH-IN Promotion and Dissemination

DELPH-IN Summit
August 3, 2015
Singapore

Emily M. Bender

# We’ve got what the world needs

- Broad-coverage, linguistically motivated parsing (and generation)
- Rich consistent treebanks/sem banks
    - Hand-curated, across lots of genres
    - Limitless, if noisier, with automatic parse selection
    - Exportable in many different formats

# So how do we get the world to use this?

- Everything is open source
- (Most) resources are associated with publications
- DelphinApplications page
- Suggestion:Tutorial at *ACL
