

# ERG 2022 release plans

**Dan Flickinger**

CSLI, Stanford University

DELPH-IN Summit 2022

Fairhaven/Bellingham

18 July 2022

# Overview of changes from ERG 2020

- Improved gold coverage (WSJ 94.1% > 95.8%): better rules
- Improved efficiency (about 10% faster): less chart clutter
- Addition of Singlish dialect variant: Siew Yeng Chow thesis
- Expanded mal-rule inventory

# Current status of pending 2022 release

- What is done

- Gold profiles fully updated

- MRS well-formedness checks completed

- Settings added to enable chart-mapping in LKB-FOS

- Configuration added for Singlish

# Current status of pending 2022 release

- What is done
  - Gold profiles fully updated
  - MRS well-formedness checks completed
  - Settings added to enable chart-mapping in LKB-FOS
  - Configuration added for Singlish
- What remains to be done
  - Generation still being tested
  - Hunt continuing for efficiency gains
  - Parse selection model could be retrained

# Current status of pending 2022 release

- What is done
  - Gold profiles fully updated
  - MRS well-formedness checks completed
  - Settings added to enable chart-mapping in LKB-FOS
  - Configuration added for Singlish
- What remains to be done
  - Generation still being tested
  - Hunt continuing for efficiency gains
  - Parse selection model could be retrained
- What would be welcomed
  - Improved lexical filtering via ubertagging
  - Better doc strings for all rules

# ERG 2022 parsing to packed forest on wsj00
