

DELPH-IN Documentation and the New System

Overview

- We now have two sites: The Wiki and The Documentation Site.
- The Wiki: The "Filing Cabinet" of DELPH-IN
 - History of the project
 - Maintains topics of all types, all quality levels
 - Articles can be added, removed, edited by anyone with permission
 - A good place to find anything, but not necessarily well organized or up-to-date
- The Documentation Site: The “Public Face” of DELPH-IN
 - *Curated* to contain current and coherent entries
 - Carefully maintained to have a professional look
 - Navigation and search make things easier to find
 - It is the "public face" if you are using and learning about DELPH-IN.

Demos

- Finding
 - Search “loc_nosp” in google
 - Search “DELPH-IN” docs
- Demo the documentation site
 - Navigation that makes it easy to discover and browse
 - Links stay in the site
 - Broken (internal) links are removed
 - Fast full text search of everything in the site (click the magnifying glass in upper right)
 - Edit and history links at bottom
 - Phone access

Features

- It gets *built* (daily) and can pull content from different sources:
 - Any GitHub source (including the docs wiki)
 - content is included exactly as it is in the Wiki, but hosted in the docs site.
 - Automatically updates once a day, if Wiki changes
 - Easy to add new files or reorganize the structure.
 - Pages can be built from any tool (i.e. grammar source)
- Other Features
 - Link at bottom of every page to edit Wiki
 - Links between pages are preserved but repointed to the doc site
 - Broken internal links are removed
 - Reports broken links inside the wiki or to external sites
 - Zero hosting costs!

Demo Modifications

- Repository Actions
- Adding a page that is missing
- Reorganizing a section
- Checking external broken links
